CAMELLIA RETICULATA

*Christian & Johnson
Company*

PRICE *1949* LIST

CHRISTIAN & JOHNSON COMPANY
CHICO, CALIFORNIA
TELEPHONE 367

With the distribution of this new 1949 Catalog we announce the change in ownership and change in name of the Lindo Nursery to the Christian & Johnson Company.

In making this announcement we want first to give full credit to the founders of the business and its former owners for having developed what is probably the finest and most complete assortment of Camellias on the Pacific Coast, if not in the entire country. Their general nursery business also has been established on a sound foundation so that we assume ownership with both pride and confidence.

The new owners, the Christian & Johnson Company, are well known in the field of plant culture and farm development and with them will continue the expert horticulturists and nurserymen who have been instrumental in building the reputation the Lindo Nursery has enjoyed for so many years. To these will be added, of course, our own corps of experienced men.

All the established operations of both concerns will be continued and grouped in the one location. An idea of the extent of the services and merchandise now being offered may be gained by reading the brief summary on the inside back cover of this catalog.

Our Experience

We have specialized in the growing of Camellias for over thirty-five years. During this time our stock has grown from a dozen varieties to over five hundred. From an entirely local distribution, our shipments have increased each season until now they are going into practically every community of the United States where the climate is hospitable to Camellias. In propagating, growing and shipping hundreds of thousands of Camellias, it is only natural that we should have accumulated a great deal of basic information on the subject. On the next three pages of this catalog we present the highlights of cultural requisites. We are always glad to assist you with additional information.

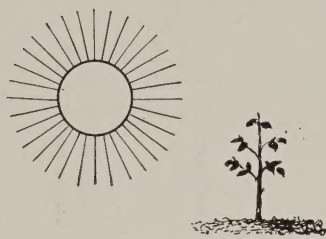

Our Camellias

Our Camellias are grown under conditions that are practically ideal, based upon our own experience and climatic conditions. All of our plants are strong, vigorous and healthy. Our nursery is regularly inspected by an entomologist of the California State Department of Agriculture, and all shipments to points within this state, and shipments to other states bear an inspection certificate.

Generally speaking, small plants are usually not well furnished with dense foliage. Some varieties, such as Kumasaka and Campbell, become very bushy when still quite small. Dense growth usually follows as a natural consequence when Camellias are planted out into the garden. With reasonable care and a generous application of good common sense, our Camellias will delight the home gardener in those sections of the country where Camellias are successfully grown.

Cultural Hints

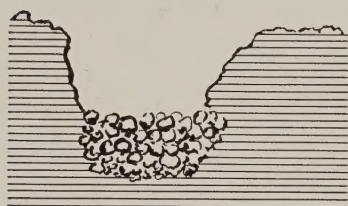

stand morning sun, and in many localities afternoon sun. Some varieties will tolerate more sunshine than others. The safe rule to follow is to give them as much sun as they can stand without burning the foliage. Sunshine produces more flowers.

Exposures

Contrary to a general conception, Camellias do not thrive best in full shade. In such a location you get a lovely green foliage, but very few flowers. Nearly everywhere, they will

Soil

absolutely necessary. If your soil is heavy and water retentive, place some gravel in the bottom of the hole to drain away the excess water quickly.

Since the feeder roots of Camellias are very fine and hair-like the soil should be loose and friable to give the roots an opportunity to forage. A mixture of $\frac{1}{3}$ loam, $\frac{1}{3}$ leaf mold, and $\frac{1}{3}$ peat moss gives just about the right tilth to the soil as well as an acid reaction. Good drainage is

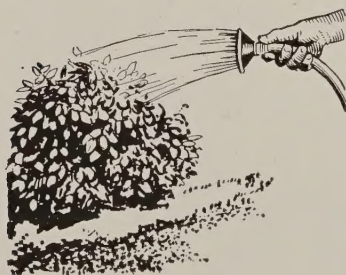

Planting

around the sides with soil, leaving a basin around the plant for water. Never plant a Camellia deeper than it was growing at the nursery.

Dig a hole at least 1 foot larger in diameter than the root ball of the Camellia. Fill this hole with the soil mixture mentioned above. Firm the soil in the bottom of the hole so that it will not settle after the Camellia has been planted. Place the Camellia so that the top of the root ball is even with the surrounding soil; fill

Watering

form. Water the plants overhead, as they never mildew and washing the foliage is very beneficial.

Water Camellias immediately after planting, giving them a good soaking. Thereafter, keep the soil uniformly damp—not soggy. Never permit the soil to dry out and cake. The feeder roots are in the top few inches of soil and they cannot take up nourishment out of dry soil. All plant nourishment is absorbed in liquid

Fertilizing

You should use an acid reacting fertilizer, sold by most nurseries, and begin applying it in the spring just as soon as the Camellia is through blooming, as new growth is about to begin. Loosen the top half inch of soil with a hand cultivator as illustrated below, apply two handsfull of fertilizer around a small plant, more around larger bushes. Water immediately. Using this amount of fertilizer, two applications a year is sufficient.

Camellias are top feeders and should never be cultivated deeply. It is well to keep the surface of the soil loose so that water will permeate and not run off. This is especially desirable after fertilizing. Use a hand cultivator and do not cultivate deeper than about $\frac{1}{2}$ inch—just enough to prevent a top crust from forming. Weeds should be pulled by hand from immediately around the plant.

Cultivating

Camellias very often set more buds than it is desirable for a plant to mature. To leave all of these buds on a plant causes it to exhaust its energy maturing a large crop of sometimes inferior flowers. By proper disbudding and fertilizing, you can appreciably increase the size of the blooms. Leave but two buds to each terminal and be careful not to injure the sharply pointed leaf bud in removing the flower buds.

Disbudding

Planting Season

Under favorable conditions Camellias can be planted during almost any month of the year if bought in containers and the root system is not disturbed in transplanting. Balled plants are taken up in the nursery during the winter and early spring when the plants are dormant, and should be set out in the garden at that time. In our nursery we normally ball Camellias from the first of November to the middle of April—depending upon weather conditions.

Balls or Containers

Some Camellia buyers prefer to buy plants grown in containers and to accommodate this trade we grow a certain amount of stock in gallon cans. By far the lion's share of our stock, however, is grown in the ground under lath, and must be balled before shipment. This applies especially

to the larger sizes. Because of the light friable condition of our soil it fuses easily with the soil in the new location to which our plants are moved when sold. This adds much to the ease with which our plants grow and become established in their new homes. We pride ourselves on the vigor of our plants.

Picking

A Camellia bush can be ruined by improper removal of the flowers. Flowers wanted for floating in a shallow bowl should be twisted off, and leaves from other parts of the plant inserted where required in the arrangement. Those for corsages should be cut with shears or sharp knife, taking only two or three leaves with the flowers. Make the cut $\frac{1}{4}$ inch above a leaf on the new wood which shows a dormant bud in the leaf axil.

Nomenclature

The nomenclature of Camellias has been confused for over a hundred years. Oft times, the same Camellia can be bought in different nurseries under three to six different names. The nomenclature varies considerably between the deep South and the Pacific Coast. We are exceedingly careful in the labeling of our stock and we try to the best of our ability to give each plant its correct name. Because of this confusion we cannot guarantee that any plants you receive from us will be identical to those known to you under a given name and bought elsewhere. We do guarantee them to fit the descriptions carried in our catalog, and if you purchase all of your Camellias from us you should be able to avoid any duplications in your collection.

Collectors of Camellias

For people collecting Camellias and those interested in a large number of varieties we have prepared a mimeographed list covering most of the varieties in our collection.

We invite your further inquiries and will be very pleased to send you the additional list mentioned above.

Where our stock is very limited we will take orders and graft plants for customers for future delivery. Small grafted plants can be delivered next Spring and large grafted plants on five and six year understock can be delivered next Fall, 1949.

Our Collection includes over 600 Varieties of Camellias. Only a comparatively small number of these are listed below. We welcome inquiries.

Group	Name	Sizes in Inches
A	Adolph Audusson.....	9, 12
	Large, semi-double, red or variegated. Rare.	
2	Akebono	6, 9, 12, 18, 30
	Semi-double, beautiful salmon-pink, of exquisite formation, medium large. Blooms mid-season.	
3	Akebono Variegated	9
	Semi-double, delicate pink with pink stripes, medium large. Blooms mid-season.	
2	Althea Flora	6, 12, 18
	Deep pink, short petals, peonia type with stamens interspersed in petals. Blooms late.	
2	Amabilis.....	6, 12, 24, 30, 42
	Single white, nearly half of flower covered with yellow stamens, medium size. Blooms mid-season.	
2	Amabilis Variegated	9
2	Anna Frost.....	9, 12, 18, 30
	Peonia type flower, deep red, medium large.	
3	Apple Blossom	18, 24, 30
	Small single blossom resembling the apple blossoms. Slightly fragrant.	
1	Aspacia (Great Eastern).....	6, 18
	Peonia type, stamens intermingled. Deep orange red with an occasional white blotch.	
B	Barbara Lodge	18
2	Beauty de Nantes	9, 18, 24, 36
3	Belgian Red (Romany).....	6, 9, 18, 24
	Full double symmetrical form, clear medium red, medium large.	
2	Belle Romana	9, 18, 36, 42, 60
	Loosely formed showing stamens, extremely variegated, general color deep pink, very large.	
2	Bessie McArthur	6, 12, 30
	Rose color. Peonia type with heavy yellow stamens interspersed with large folded petals. Blooms March.	
3	Bolen's Late Tricolor	6, 9, 48, 60
	Semi-double, pure white with red stripes or spots, large, blooms late.	
3	Campbell (Lady Campbell, Covina).....	6, 9, 12, 18, 24, 30, 36, 48
	Loosely formed flower fairly symmetrical, shows stamens, deep pink, large flower, dense grower. Blooms February-March.	
1	Candida Elegantissima	6, 12, 18, 24, 30
	Semi-double irregular form, deep pink blotched white, extremely large.	
2	Candidissima (Louise Centuroni)	9, 18, 24, 30
	Full double, imbricated white, very regular, medium sized flower. Blooms March.	
2	Celtic Rosea (Semi-Double Blush)	9, 12, 18, 24
	Semi-double showing stamens, has the faintest trace of delicate pink, medium small.	
2	Chandleri Elegans	6, 9, 12
	Semi-double, pompon center, deep pink blotched white, extremely large.	
2	Christine Lee	6, 9, 12
	Semi-double with yellow stamens. Bright red. Large flower. Blooms February-March.	

Group	Name	Sizes in Inches
3	Christmas Cheer Single rose pink, prominent stamens.	24, 36
1	Empress of India Peony shaped with unusual shade of salmon pink.	9, 12
3	Enrico Bettoni Irregular formation, medium red, medium large.	6, 9, 12, 18, 24, 30, 36, 48, 60, 72
3	Eureka Red Full double, symmetrical, medium red.	Liners, 6, 9, 18
2	Fanny Boles Loosely formed flower, shows stamens deep pink, blotched white, large.	6, 12, 24, 30, 36
B	Flame Large semi-double, deep vivid red.	6, 18
1	Francine (Chandleri Rosea) 	9, 12
2	Gaiety Loosely formed flower, fairly symmetrical, deep pink with white splotches.	6, 12, 18, 30
2	Gerbing's No. 7 Delicate pink, pompon center, medium size.	6, 9
2	Glory de Moultrie 	12, 18, 48, 60
1	Governor Mouton Brilliant red, pompon center. Medium blossom, Blooms February-March.	6, 9, 12
2	Grandiflora Rosea Semi-double, outer petals turn back, prominent stamens, deep rose, extremely large.	6, 9, 12
2	Guilfoyle's Helenor (Guilfolius Hellena)..... Full double, very symmetrical, medium pink streaked with fine deep pink stripes, large.	6, 18
B	H. A. Downing Loosely formed flower fairly symmetrical, shows stamens, deep pink, large flower.	6, 9, 12, 18
2	Hikari Gengi (Herme, Jordon's Pride)..... Loosely formed flower, fairly symmetrical, some- times shows stamens other times has pompon cen- ter, blended with three distinct shades of pink. Large.	Liners, 6, 9, 12
2	Honor de Amerique (Gunelli-Monarch) Large, deep peony pink. Late bloomer.	6, 9, 12, 18, 24, 30, 36
3	Hopkin's White Single white with yellow stamens. Blooms early.	18, 30
3	Horkan Variegated Peonia type, white with occasional pink stripe, medium blossom.	6, 9, 12
1	II Tramento (Laurel Leaf, Lallarook)..... Symmetrical, full double flat flower, medium pink. Good color and texture. Large.	6, 18
2	Imperator Pompon type shows some stamens, deep red. Large.	6, 9, 12, 18, 24, 72
A	Imura White Very large, pure white with yellow stamens.	Liners, 15
2	Jarvis Red Pompon center, brilliant red, medium large.	6, 12, 36
2	J. H. L. Patchett Variegated..... Semi-double showing stamens, beautifully streak- ed and splashed with deep pink, light pink back- ground.	42
A	J. J. Pringle Smith..... 	Liners, 12
A	John G. Drayton Large semi-double, medium pink with variable flower forms.	6, 9, 12
3	John Laing (Henry Favre) Full double, symmetrical, medium pink, medium large.	6, 12, 18, 30, 36

This Page Was Omitted By Error From Our 1949 Catalog

Group	Name	Sizes in Inches
3	Christmas Red Single, medium small flower, brilliant red.	24, 30
3	Clevina Solid pink, peony type, medium size.	30, 36, 42, 48
1	Colonel Firey Extremely double, very symmetrical, brilliant red, large. Blooms late.	6, 9, 12
B	Crystal Palace 	12, 18, 24
2	Daikagura Loosely formed peonia type, very deep pink, very large. One of the first to bloom in the fall. September-March.	6, 9, 12, 18
2	Daikagura Variegata Same as Daikagura except for having clear white blotches.	6, 9, 12
1	Daikagura (Predominately white) Same as Daikagura Variegata except the coloring is predominantly white instead of red.	6
2	Dainty Single, cup shaped, delicate pink with yellow stamens.	12, 24
2	Dante (Pine Cone White)..... Full double, very symmetrical, high center, pure white, medium large. Blooms December-March.	12, 24
1	Derbyana Rose pink, full double, yellow stamens. Petals cup up. Large flower. Blooms March.	9, 12, 18, 30
2	Duchess of Sutherland Large, open petaled, white, one petal showing pink spot.	6, 9, 18
2	Ecstasy Double, clear pink, medium size.	9, 36, 42
B	Edith Churchwell 	9, 12, 18
A	Eleanor Hagood 	12, 18, 36
2	Elena Nobile (Napa Red)..... Very full, double, very symmetrical, deep clear red, large. One of the latest to bloom. March-April-early May.	9, 12, 18
2	Elizabeth Medium size, symmetrical, white with pink stripes.	6, 60, 72
B	Emperor Large, peony shaped, rose pink.	48
1	Emperor of Russia Peonia type, stamens intermingled, deep orange red.	9, 12, 24
A	Emperor Wilhelm Very large, deep red, mottled white, usually pompon center.	Liners, 6, 12

Group	Name	Sizes in Inches
B	K. Sawada	Liners, 6
2	Kumasaka (Beni Koroka) Double, irregular form showing stamens within the center, very fine deep pink, large flower.	6, 9, 12, 18
B	Lady Mary Cromartie Large semi-double, rose pink, stamens mixed with petals.	9, 18
3	Lady de Sumerez	36, 60
2	Lady Vansitart (Lady Vansetti)..... Semi-double showing stamens, cup-shaped red flower with white blotches. Large.	6, 9, 12, 18, 30, 36, 48
3	Lena Superba Loose peonia type, deep pink blotched with white. Large.	30, 36, 54
1	Llewellyn Red Symmetrical, full double, brilliant red, large.	6, 18, 36
3	Lindo No. 8..... Peonia type flower, shows stamens, medium size. Brilliant red.	9, 12
2	Lindo No. 17	6, 12
2	Lindo No. 19	9, 12, 18, 24
1	Lotus (Grandiflora Alba, Sodekakushi) Very large pure white lotus like blossom. Long yellow stamens. Blooms March.	9, 12
2	Madam Nihart	40, 48, 60
B	Magnoliaflora Semi-double, blush pink.	9, 12, 18
2	Marguerite Gouillon (Duc de Orleans)..... Semi-double, pompon center, light pink heavily streaked with deep pink. Medium large.	18, 54, 60
2	Martha Leggett	9, 12, 42
2	Mathotiana Alba (Blood of Christ)..... Pure white, usually has one tiny pink spot on a flower, extremely full double, very symmetrical. Very large.	6, 36, 42
2	Mathotiana Rosea Symmetrical, double, deep pink.	36, 42, 60
B	Mathotiana Shell Pink	Liners, 24, 36
2	Matsukasa (Pine Cone) Shaped like a pine cone, high centered regular formation, rose pink blotches with white. Med- ium large.	9, 36
3	Miss Dora McCarter Large single white with long yellow stamens. Blooms February-March.	36
A	Missima	Liners, 30
2	Monjishu Variegated (Calif. Donkilari)..... Semi-double, fairly symmetrical, shows stamens, deep red with large clear white blotches, some- times solid red. Large.	6, 9, 12, 18
2	Montironi Large white, extremely double, deep pink splashes over some petals and sometimes flowers come a solid pink.	24, 42, 54
2	Moonlight Semi-double, creamy-white flowers showing sta- mens.	9, 12
3	Mosspoint Variegated Large outer petals, pompon center, deep pink blotched with white. Large.	6, 9, 12, 18, 24, 42
3	Mrs. Abbey P. Wilder (Cameo)	30, 36
A	Mrs. Chas. Simons Large semi-double, white.	6, 9, 12
B	Mrs. Meredith Lake	6, 12, 18, 24

Group	Name	Sizes in Inches
2	Mrs. Wm. Thompson (Grandiflora Alba) Semi-double, two rows of petals, extremely large flat flower. Stamens and petaloids in center.	9, 12, 18, 24, 48
2	Normandie Pompon type, deep pink flecked with white. Large.	6, 12, 18, 24, 30, 36
2	Opelon's Peony Medium pink, peony type.	60, 66, 72, 84
1	Otome Large, symmetrical, double, pink with a pale pink border.	9, 12, 18, 54
2	Panache Full double, medium large and symmetrical. Flower is unusual in marking, being white in center with deep pink at base of petals. Outer petals streaked with deep pink, giving an appearance of heavier shading at outer edges. Blooms December.	9, 12, 18, 24, 36, 48
A	Pax Liners, 12	
2	Peoniaflora Peony type, large pompon center, white blotched with deep pink. Extremely large.	9, 12, 18, 24, 36
2	Pink Ball Medium sized flower, delicate pink with pompon center.	6, 12
2	Pink Hikari Gengi (Pink Herme)..... Loosely formed flower fairly symmetrical, sometimes shows stamens, other times has pompon center. Solid pink in coloring.	12, 18
B	Pink Peoniaflora Beautiful Sport of Peoniaflora.	6, 9
3	Pink Perfection Full double, very symmetrical, shell pink, medium large. Blossoms mid-season.	9, 12, 18, 24
2	Pink Star Semi-double, about two rows of petals open out flat, light pink color, shows veining. Very large.	9, 12, 18, 24, 30
2	Pope Pius IX Full double, very symmetrical, brilliant orange red color. Large.	9, 12, 18
3	Pride of Rosebud Farm Semi-double, shows stamens, petals crinkly, deep rose pink with white blotches. Large.	6, 12, 18, 30
B	Princess Nagasaki (Mallott Variegated) Loosely formed flower fairly symmetrical, deep rose pink with clear white blotches. Large.	9, 24
2	Professor C. S. Sargent Has one row of outer petals surrounding tight pompon, deep red. Medium large.	9, 12, 18, 48
3	Purity (Neige de Oree) Very symmetrical, full double formation, pure white, medium large.	6, 12, 24, 36
1	Red Belle Romana Loosely formed, large red Sport of Belle Romana.	9, 30
B	Rev. John Bennett Large semi-double, salmon pink with pale lighter markings of almost white in throat.	9, 12, 18, 36
2	Robin Hood Pinkish white background with rose pink stripes, flecks, and blotches, semi-double with long yellow stamens. Medium large blossoms. Blooms Jan.	12, 18, 36
1	Rose Queen Large, clear pink, symmetrical.	9, 12, 36
2	Rubra Virginalis Loosely formed, salmon pink. Medium size.	6, 60, 72
1	Sarah C. Hasti (Debutante) Large, clear pink, symmetrical.	6, 9, 12, 18

Group	Name	Sizes in Inches
1	Snowdrift No. 1	9, 12, 18
	Semi-double, snowy white, waterlily type.	
3	Somegawa	12, 18, 24
	Full double symmetrical, delicate pink back-ground heavily striped with deep pink radiating from center. Medium large.	
2	Standard	30, 36
	Light rose pink in center shading out to darker rose pink in outer petals. Full double, symmetrical, medium large blossom. Blooms late.	
3	The Dove	18
	Semi-double showing stamens, pure white, small.	
2	Tricolor	6, 9, 12, 18, 24, 36
	Semi-double showing stamens, three shades of pink radiate from center, general color deep pink. Medium large.	
2	Vallevareda	Liners, 18, 30, 42
	Full double, very symmetrical, delicate pink center, deep pink outer petals. Large.	
2	Vallevareda Variegated	30
	Very full double, very symmetrical, delicate pink center shades, deeper pink outside, white blotches throughout. Large.	
1	Victor Emanuel (Blood of China).....	6, 9, 12, 18, 24
	Brilliant red, loosely formed large flower showing stamens.	
3	Wakanoura (Red Eagle)	9, 18, 24, 30, 36
3	Wakanoura Varigated	36
	Semi-double cup shaped, delicate pink with large deep pink blotches radiating from center. Large.	
2	Warrata (Mrs. Sol Runyan)	6, 12
	One outer row of petals frames a compact pom-pom, very dark red. Medium large.	
2	White Warrata	42, 60
	Peonia type flower, medium large, pure white. Late bloomer.	
1	White Jordan	9, 12
	Semi-double, white, with long stamens.	
1	Wm. S. Hasti	6, 12
	Double symmetrical, shows stamens when fully open, deep red, extremely large.	

NOTE

In addition to Camellias and other stock listed, we grow a very large selection of Deciduous, Evergreen, and Coniferous type Nursery Stock. We are also one of the oldest and largest growers of Fruit and Shade Trees.

Prices in this list are f.o.b. Chico, California. All transportation charges are to be paid by purchaser. We exercise great care to ship by the cheapest and best routes and to secure the lowest rates on all shipments. Residents of California will please enclose 2½% State Sales Tax.

Terms. Cash with order, except for customers having established charge accounts.

WARRANTY. Our varieties are guaranteed true to name and description under which they are sold. While there is great confusion in nomenclature and many varieties are sold under various synonyms, we are constantly on the alert for these synonyms and sell our plants under the names most generally accepted.

Other Products and Services Available at Our Nursery Store

In addition to the nursery stock described herein, Christian & Johnson Company also maintains one of the largest seed selections in the West. From 10-cent packets to acreage pasture mixes, all our seed is guaranteed fresh, of highest germination and purity, and chosen to do best in this area and climate.

Our bulb bins are carefully stocked with No. 1 grade bulbs only, in profuse variety, both imported and domestic. In season our bedding plant department offers a selection that ranks with the finest in the Country.

Our gardening department also offers tools and tested equipment to help the home gardener become more proficient. Lawn mowers, spraying equipment, garden tractors, sprinkler and irrigation systems, and endless other devices to help make gardening hours pleasant ones are on display.

Garden fertilizers, lawn seed mixtures, peat moss, vermiculite, manures and compost makers will help to make any home owner proud of his efforts.

In addition our stock of garden insecticides and fungicides is as complete as scientific advance makes possible, and our competent staff of garden specialists is more than willing to advise the average gardener in its use. Skilled help is also available from our landscaping and custom-spraying departments.

We have an excellent selection of glazed pottery and earthenware. Tubs, colorful pots, wall brackets and copperware for succulent culture are available in our gift department. Outdoor dining and patio furniture includes well made redwood pieces upholstered in the color of the customers' choice. Our barbecue equipment is both novel and practical.

Our pet department is unrivalled in its selection of equipment for aviary, aquarium and household pets. Conditioner foods and equipment will help make a dog's life a happy one.

Christian & Johnson Company also maintains warehouse stocks of agricultural chemicals, orchard and field spraying equipment and supplies, and a feed mill located at W. Sixth and Orange Streets in Chico, for the benefit of the commercial grower.
